BRAIN QUICK® Software 3

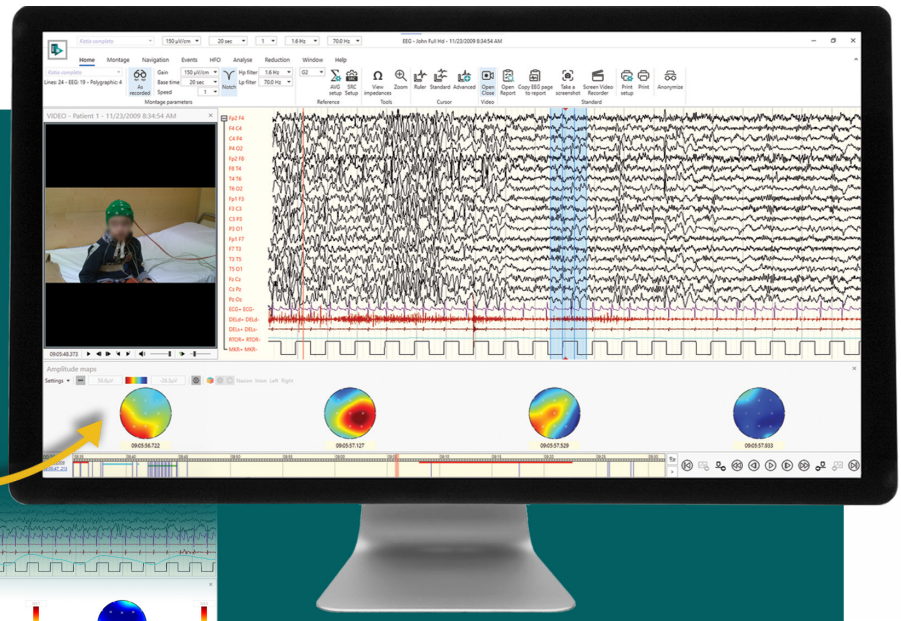
micromed® has joined Natus

The latest upgrade to the most comprehensive neuro monitoring software

Building on the success of previous iterations, the newest release of BRAIN QUICK Software 3 offers your organization an easily scalable, single-software solution with more advanced tools for patient EEG analysis and research.

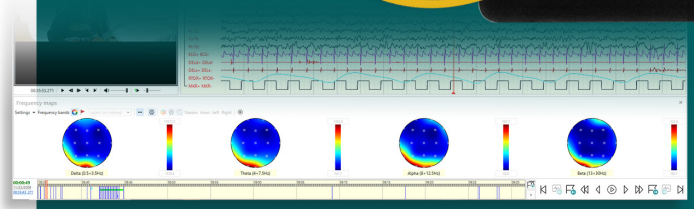
Enhanced usability for optimal efficiency

- Streamline review with new Review progress bar
- Accelerate report generation with Report dictation
- Customize toolbars in live and review according to preferred workflow
- Define custom events and perform custom searches with filter tool
- Automatic camera switching based on patient location
- Central Event Manager for setting up distinct alarm notifications to distinguish event types and acquisition stations



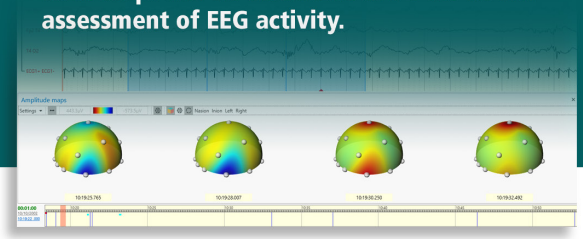
Improve EEG activity analysis with integrated Amplitude and Frequency mapping

Amplitude maps represent the distribution of the EEG amplitude in the brain.



Frequency maps represent the topographic distribution of the EEG signal in the frequency domain divided in spectral bands.

Both maps can be visualized in 3D for better assessment of EEG activity.



Innovation with advanced EEG and research tools

- Online analysers to perform analysis during live recordings
- Offline HFO detection for advanced analysis
- External Calculation Tool to import algorithms supporting new research
- Improved integration with Persyst, both online and offline
- Integrated Cortical Stimulator fully software controlled
- De-identification of data for presentations and research, ensuring privacy
- Simplified collaboration with Portable Viewer, allowing review of studies on non-Micromed systems

natus®

BRAIN QUICK® Software 3

New File Manager for streamlined database and patient management

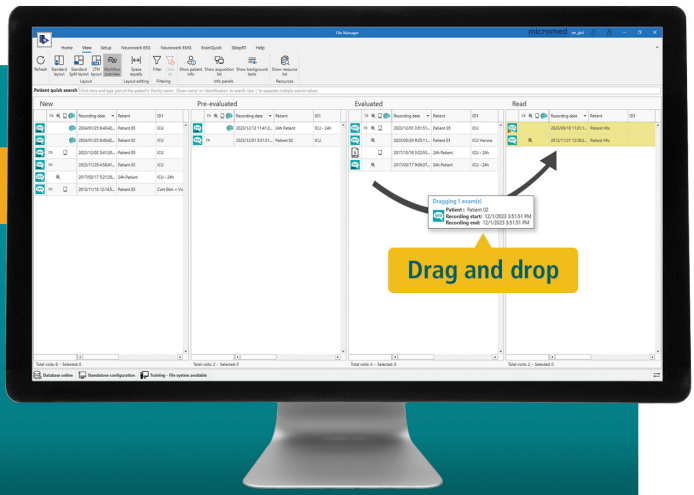
- Perform copy, transfer, pruning and archiving in the background
- Choose from multiple layout options, including study type, workflow stage or patient view
- Define user settings (montages, protocols and layouts) in single centralized workstation
- Quick edits without opening new windows
- Consolidate patient data in one convenient place by importing smartphone video and images
- Data management of exams from different Micromed platforms, including SleepRT, Moberg and Neurowerk

Multiple layouts in File Manager

WORKFLOW OVERVIEW

Easily visualize clinical workflow for the day

- Sort by **New**, **Pre-Evaluated**, **Evaluated** and **Read**
- Easily drag and drop studies to the next stage



PATIENT-BASED LAYOUT

Display all relevant information in a dashboard

- Display all the exams for a patient
- Access EEG and video synchronized or separately
- Manually attach supplementary information like video recorded from a cell phone
